

WEPOS Stone Sealer

Description:

Forms a waterproof, UV-resistant and silky gloss protective layer. The surface is water- and stain-resistant and stronger in colour and structure. The surfaces are easier to maintain. The protective layer is non-yellowing and durable. For all absorbent natural and artificial stone surfaces indoors and outdoors.

Effect:

Forms a waterproof, UV-resistant and shiny satin protective layer. The surface becomes more resistant to dirt, and its color and texture are reinforced. The stone's appearance is visibly improved. Water and dirt can no longer permeate the surface, and the surface is easier to care for. The protective layer is non-yellowing and durable.

Application:

For all absorbent natural and artificial stones, concrete building blocks, exposed aggregate concrete, slate, marble, sandstone, terrazzo, porphyry, Solnhofen slabs, concrete surfaces, etc. Can be used indoors and out, for floors, steps, terraces, balconies and windowsills.

Direction of use:

The base needs to be dry, unmarked and clean. Apply a thin, even layer using a paint roller or a brush. Do not apply more than the surface can absorb, and avoid leaving puddles. Avoid creating streaks. Drying time is about 2 hours. Do not step on the surface during this time. Afterward, protect the sealed surface from moisture for 2 days.

Important:

Surfaces must be dry before applying sealant. White marks that appear after drying indicate moisture in the stone. Application areas must also be protected from moisture from underneath. For larger surfaces, always work in sections. Cover glass and solvent-sensitive materials during the application. Do not process at temperatures below 12°C. Surfaces that are non-absorbent, polished or finely smoothed cannot be sealed.

Packing unit:

1000 ml-tin (4 per box)

Technical Information:

- Density: 0,79 g/ml
- PH: n.a.
- colour: transparent liquid
- smell: aromatic

Hazard statements:

Flammable liquid and vapour. May cause drowsiness or dizziness. May be fatal if swallowed and enters airways.

Safety instructions:

If medical advice is needed, have product container or label at hand. Keep out of reach of children. Read label before use. Keep away from heat/ sparks/ open flames/ hot surfaces. – No smoking. IF SWALLOWED: Immediately call a POISON CENTER or doctor. IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower. Store locked up. Dispose of contents/ container in accordance with local/ regional/ national/ international regulations.

Additional specifications:

Repeated exposure may cause skin dryness or cracking.

Product contains:

Naphtha, hydrotreated heavy
