# REPAIR WRAP

The FiberFix Repair Wrap combines industrial strength fiberglass with a unique polyurethane resin to make a tape that is strong like steel! Simply dip the roll in water to activate the resin, wrap it around what you need to fix, and in 10 minutes it will harden giving you a permanent repair! It is waterproof, sandable, and paintable, so you can use it to repair leaky pipes, broken tools, broken furniture, and more! It comes in three different sizes to fit your repair needs.

# RIGID PATCH

The FiberFix Rigid Patch provides a permanent fix for all your holes and cracks on rigid surfaces. Use the Rigid Patch to fix your boats, canoes, garbage barrels, water tanks, vehicles, and more! The Rigid Patch cures with sunlight and UV light, and hardens in as little as 3 minutes! The Rigid Patch comes with 3 different sized patches depending on the repair you need.

# HEAT WRAP

The FiberFix Heat Wrap is your permanent repair solution for exhaust pipes, hot water pipes, and other high temperature repairs. Like the Repair Wrap, it hardens like steel, giving you a structural repair that will actually last! All you need is to activate it with water, and in as little as 1 hour it will fully cure.

# 10X TAPE

FiberFix 10x Tape is the industrial-strength tape for everyday users. 10x Tape is ten times stronger than duct tape, with woven plastic fibers and a water-resistant laminate. 10x Tape is virtually untearable, making it perfect for tape jobs that you want to last. It comes with a blade in the roll so you can cut off what you need- it's that strong!

# TOTAL REPAIR

The FiberFix Total Repair is a light-accelerated super glue with an included blue light. By shining the included light on the glue, you can control when it cures, and how quickly! Total Repair glue cures in seconds when exposed to the blue light- you can use it to instantly bond objects, seal cracks, fill gaps, and rebuild objects.

# EXTREME

FiberFix Extreme is your glue for extreme jobs! With a strength rating of over 2600 lbs, Extreme is your glue to last. It is also uniquely formulated to provide some flexibility to the glue for more elastic repairs. With 15 grams of glue in the tube, you have everything you need for a long-lasting glue job.
