

F5 cera speed
evolution line

For cutting quarry tiles, stoneware and granite slabs.

Thanks to its thickness of only 1.2 mm and the special geometry of the continuous rim, the F5 cera speed ensures both, an exceptional cutting speed and a comfortable and smooth operation. The 10 mm segments guarantee an optimum lifetime. The integrated flange around the bore makes sure that the blade can be used safely in every situation.

Packing unit: 1 pc.

- 1.2 mm thin cutting rim with special geometry
- clean cutting edges
- minimal material loss
- exceptionally fast cutting
- easy to use
- 10 mm segment height

Dimension inches	Speed r.p.m.	Height of segments in mm	Shape	Item code	EAN
4.5 x 3/64 x 7/8	13280	10	GR	4115514100	4081600 41132
5 x 3/64 x 7/8	12200	10	GR	4125514100	4081600 41149

Most suitable for cotto plates, fine stoneware, quarry tiles, tiles

Very suitable for granite, terrazzo, gneiss

Well suitable for concrete, concrete roofing tiles, porphy
